I found the course to be extremely valuable for our master's programme. I think, however, that the level seems a bit too difficult. Some concepts for most of students we have never seen before. Given that, I think we needed to have more opportunity to make exercises in class (specially MATLAB exercises).
The course was fantastic! Both Marcus and Jesper did a great job lecturing.
Markus and Jesper did an amazing job! 10/10, my only remark is the course literature, I bought the book but it didn't feel very relevant, the slides and the lectures were more than enough! Highly recommend future students taking this course.
I risk of sounding like a suckup, I absolutely loved this course. The subject is very interesting but I found that Marcus and Jesper but a lot of effort into shaping the course in a fun and intuitive way. Very helpful when asking questions. Very relevant problem sets etc. Overall very much appreciated the course.
A really good course and super teachers that are really engaged and make us student want to learn and enjoy the course.
